Experience a Different Approach to Recovery

Our approach is simple: Provide the best medically supervised detoxification and residential treatment services possible. We believe in building trust and rapport with our clients and their families from admission to discharge. Our integrative care approach allows for transformational change.

Medically supervised 24/7,
eliminating health risks and ensuring
the highest standards of safety.

Medication assisted care to
minimize pain and discomfort
during withdrawal.

Personalized to meet client's
needs and provide a foundation
for lasting recovery.

24/7 Medically Supervised Detox

Detox is the first step in the recovery journey. Our team makes it as seamless, comfortable, and effective as possible. Along with providing medically assisted detox we begin to introduce our clients to the concept of change. Our detoxification and withdrawal management are designed to safely treat individuals withdrawing from:

- Opiates
- Benzodiazepines
- Alcohol
- Methadone/Suboxone
- Stimulants
- Polysubstance

We use evidence-based, clinically proven models that provide a safe, effective detox process.

Residential Treatment

In a residential setting, individuals are provided with structure and support in early recovery. Experience Recovery personalizes treatment to each client yet offers a complete wellness approach that is consistently informed by science, driven by data, and administered in accordance with proven methods designed to anchor lasting recovery.

Our therapeutic Model Focuses on:

- Evidence Based Modalities
- Integrative Nutrition
- Peer-to-Peer Groups
- Individual Therapy & Family Class
- Mindfulness & Breath Work
- Trauma-Informed Methods

Admission into our Residential Treatment program will be determined based on your medical necessity and your clinical team. You must be medically/clinically cleared to enter our residential program and may have to complete detox prior to admission.

Accreditations & Designations

We are Joint Commission accredited at all levels of care. We are proud to have the State of California ASAM designation as well as Integrated Medical Services designation (IMS)
